January 27, 2012

Dear Community Partners:

It is with great pleasure and excitement that I am writing this. In October of 2011 I was elected by the CPAM membership as President of our organization. I look at this as an opportunity to build on what our past President, Board Representatives, and Organization Members have completed. I also look to reach out to others to share with them what CPAM has to offer and hope to build this great organization. CPAM has a long history here in Michigan and many of the people who have helped to build it into what it is today have moved on. As a board we will look to continue to build membership through new partnerships statewide.

This organization belongs to its members and as such I ask you for your help in keeping your board informed as to your needs in your specific community. How can we as an organization assist you? What type of training or information do you need? I invite you to please check our website often for information, training and dialog as to current trends and needs in Crime Prevention. We are also looking for those interested in serving the organization in some way or another. If you have an interest in serving on a committee or hosting a training or meeting please let us know.

As we move ahead we will try to give you ample notice as events come up and ask that you do your part to join us in meetings, trainings, and sharing the message of Crime Prevention. We are all in a position where we are forced to do more with less, by members becoming involved and working together we can do just that accomplish more with less. As an association we will be meeting each quarter starting on March 2<sup>nd</sup>, 2012. We also have set a date for the annual conference which will be held once again in Mt Pleasant, Michigan October 10-12, 2012.

I thank you for the trust you have placed in me and my fellow board members and look forward to making the Crime Prevention Association of Michigan a force to be reckoned with in the world of Crime Prevention.

*Lee Hoeksema*

Lt. Lee Hoeksema  
CPAM President
